6666 Rue St. Urbain, Montréal, Canada

EDUCATION

M.Sc. in Applied Computing, Department of Computer Science, 4.0/4.0 (A+) University of Toronto, Downtown Toronto, Canada

- Received the Vector Institute Scholarship in Artificial Intelligence (VSAI) valued at \$17,500 awarded to 66 scholars in Ontario
- · Specialization: Computer Vision, Deep Learning for Healthcare, Reinforcement Learning, Geometry Processing

B.Tech. in Engineering Physics with Minor in Electronics Engineering, Department Rank 1 Jul 2012 – Jun 2016 Indian Institute of Technology (IIT), Guwahati, India

• Institute Silver Medalist for the best academic performance in the department among the graduating class of 2016 at IIT Guwahati

WORK EXPERIENCE

Research Engineer 2, Foundation Models and LLMs Deep Learning for Capital Markets and Credit Modeling

- Leading research and development of Foundation Models and LLMs that leverage proprietary data at RBC (Canada's largest bank) to revolutionize applications in finance, particularly repo trading, using fine-tuned encoder models alongside agentic RAG systems
- · Proposed novel loss functions for non-parametrically matching distribution of predictions to business-specific needs to improve Credit Modeling, leading to over 10 Million CAD in annual incremental revenue across 13 Million customers

Research Engineer, Computer Vision	Samsung AI Centre, Toronto
Deep Learning for Image Enhancement and Synthesis	Feb 2020 – Jun 2022

· Led projects in Multi-frame Alignment for Burst Photography using Neural Implicit Models, and Self-Supervised Learning for blind image denoising (low-light night mode) and super-resolution (digital zoom) on Samsung Galaxy mobile phone cameras

Software Engineer 2, Big Data and Machine Learning Machine Learning for Malware Detection

- Co-led the development of an **XGBoost** model in production on **Norton Anti-Virus** by leveraging Symantec's **Big Data** telemetry of file attributes, which reduced over 60% of previously missed malware detections
- Led research on proactive protection against malware by modeling Generative Adversarial Networks (GANs) over a distributed image representation of dynamic file behavior (Pre-print: arXiv:stat.ML/1807.07525)

RESEARCH INTERNSHIPS

Research Intern, Computer Vision

Supervised by Dr. Alex Levinshtein and Prof. Allan Jepson (University of Toronto)

• Improving object detection in cluttered scenes using part-based auxiliary targets with single-stage methods for on-device inference

Research Visitor, Machine Learning for Health

Supervised by Prof. Marzyeh Ghassemi (University of Toronto)

- Utilizing patient data from the General Internal Medicine ward to assess a patient's risk of ICU transfer or death early
- Proposed a data-driven regularization layer that improved generalization and interpretability of predictions by incorporating **ICD-10 diagnosis codes** into the model (without requiring them during inference)

Undergrad Research Assistant, Nano-Photonics

Supervised by Prof. Michal Bajcsy (University of Waterloo)

· Evaluating novel hollow-core photonic-crystal fibre designs by simulating EM wave propagation for on-chip photonic transistors

ACHIEVEMENTS

• "Samsung Research America Rockstar" peer-to-peer recognition Award	2021
• Selected for AI Residency Program at Google X, Mountain View (Did not accept the offer)	2019
• Symantec WOW (Winning Our Way) Level 1 & Level 3 company-wide recognition awards for "exceptional performance the focused collaboration with teams"	hrough 2018
• Kaggle 'Competitions Expert' ranking for being placed 835 out of 69,593 competing data scientists	2017
• Shortlisted among 25 students selected internationally for USEQIP 2015 Summer School at the Institute for Quantum	
Computing and the Perimeter Institute for Theoretical Physics in Waterloo, Canada	2015
• National Initiative on Undergraduate Science (NIUS) scholarship awarded by the Tata Institute of Fundamental Resear for pursuing research at leading physics labs in India for the year	ch (TIFR) 2013

TECHNICAL SKILLS

- Scripting/Languages: Python, C++, Java, C, Unix Shell
- Databases: SQL (RDBMS), NoSQL, Big Data management on Hadoop eco-system (Hive, Oozie, HDFS, MapReduce)
- · Packages: PyTorch, Hugging Face Transformers, XGBoost, Pandas, Eigen, Libigl

ACADEMIC SERVICE

- Academic Reviewer for ICML 2025, CVPR 2025/2023, ICCV 2023, WACV 2023
- Mentor to Graduate Students at Mila (Quebec Artificial Intelligence Institute), 2022–23
- Mentor to Undergrad Students at the Department of Computer Science, University of Toronto, 2022–Present
- Research Supervision to undergraduate student teams through the "Let's Solve It" program of Borealis AI
